# HAMMADA BALLALI

NATIONALITY: SPANISH – RIGHT TO WORK IN THE UK - ILR
+447376246369
**ballaliebbihammada@gmail.com ·**
**https://www.linkedin.com/in/hammada-ballali-ebbi-4aa5091ba/**

Experienced IT professional and PhD candidate in Computer Vision with a strong foundation in machine learning and data analysis. Proficient in designing and implementing Python-based solutions, developing ML models, and optimizing workflows for data-driven applications. Skilled in leveraging Python libraries such as TensorFlow, PyTorch, and scikit-learn to build, train, and deploy models for predictive analytics, computer vision, and automation. Experienced in deploying applications on Windows and Ubuntu servers, managing AWS services, and integrating machine learning pipelines into cloud environments. Adept at automating processes using Python scripts and Docker, with hands-on experience in tools like Kafka and Kubernetes. Passionate about AI and machine learning, with a focus on advancing cutting-edge technologies in computer vision to deliver innovative and impactful solutions.

## EXPERIENCE

04/2025 – 04/2026

### TECHNICAL SPECIALIST L2+ INFRASTRUCTURE ENGINEER

Centred Solutions, Runcorn, UK

- Manage, deploy and update Network and Computing resources.
- Deploying Django applications in Linux Servers
- Administering and managing VMware ESXi and Proxmox hypervisors, for optimal performance, uptime, and security for virtualized environments.
- Manage and monitor and update PostgreSQL servers (Linux – Ubuntu servers)
- Writing and running Ansible scripts.
- Nginx deployment and troubleshooting.
- Manage IT aspects of servers: DNS, routing, interfaces, firewalls and certificates.
- Customize and run PowerShell and Python scripts.
- Ensuring Ensure compliance with internal security policies and regulatory requirements (e.g., GDPR, ISO27001, Cyber Essentials).
- Deploy Docker, Kafka, and Kubernetes.
- Assist developer team in ClickUp by updating user stories and testing features.
- Support customers in troubleshooting application issues, and root cause analysis as well as monitoring tickets in Odoo.

10/2024 – 11/2025

### CODING EXPERTISE FOR AI TRAINING

San Francisco Bay Area (Remote - Freelance)

- Crafting and answering questions related to computer science in order to help train AI models
- Evaluating and ranking code generated by AI models

06/2023 – 04/2025

### APPLICATION SUPPORT SPECIALIST – SALES ENGINEERNG TEAM

ZOLL Medical, Runcorn, UK

- Deploy and install applications on Windows and Ubuntu servers.
- Handle Active Directory and LDAP communications with application servers.
- Manage and monitor Windows EC2 instances for IIS and SQL servers, as well as Linux EC2 instances in AWS hosting various applications.
- Monitor costs and services in AWS.
- Manage IT aspects of servers, including DNS, routing, interfaces, firewalls, security groups, and certificates.
- Customize and run PowerShell and Python scripts.
- Support Company SDK use for Android, SWIFT, and .NET.
- Deploy Docker, Kafka, and Kubernetes.
- Ensuring Ensure compliance with internal security policies and regulatory requirements (e.g., GDPR, ISO27001, Cyber Essentials).
- Support customers in troubleshooting application servers and SQL servers, as well as monitoring ticketing systems Zendesk/Salesforce/Jira
- Pre-sales support within the Sales Engineering Team

**10/2022 -06/2023**

### TECHNICAL ASSISTANT

Liverpool Hope University, Liverpool, UK

- Assisted primary mathematics department professors in research by processing and presenting data using Tableau, Power BI, and Excel. Created presentations with PowerPoint to effectively communicate findings.

## EDUCATION

**02/2025 – CURRENT**

**PHD COMPUTING,** UNIVERSITY OF WALES TRINITY SAINT DAVID

- Deep Learning-Based Synthesis of 360° Virtual Reality Photorealistic Scenes from Monocular 2D Videos

**10/2024**

**MASTER OF SCIENCE IN SOFTWARE ENGINEERING AND ARTIFICIAL INTELLIGENCE,**
UNIVERSITY OF WALES TRINITY SAINT DAVID

- Dissertation in Deep Learning Model for 12 Lead ECG classification
- Coursework Cloud Computing Docker Compose Deployment of Django/React application in AWS.
- Coursework in AI Meta Ensemble Deep Learning Model for Sentiment Analysis
- Coursework in Software Engineering Agile Plan Conception and Design
- Grade: Distinction

**07/2023**

**BACHELOR OF SCIENCE IN COMPUTER SCIENCE,** LIVERPOOL HOPE UNIVERSITY

- Dissertation in Machine Learning: Bellman Ford and Dijkstra Comparison
- Coursework in 3D Unity C#
- Coursework in Machine Learning
- Coursework in MERN stack – Web development
- Coursework in LUA IoT
- Grade : 1st Class A+

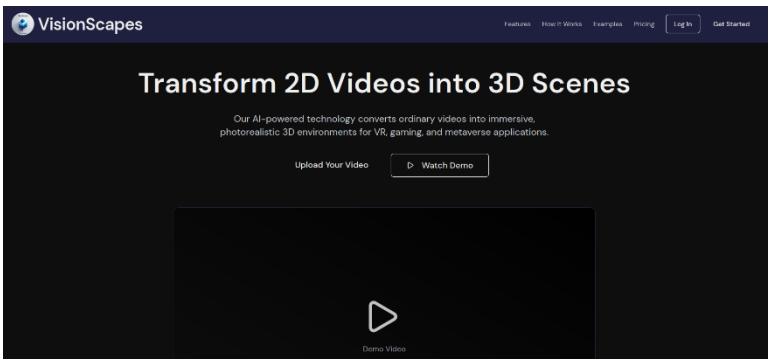
# PERSONAL PROJECTS

06/2025 – In development

## VISIONSCOPES

https://github.com/HammadaBE/VisionScopes-Demo

- React · TypeScript · Tailwind CSS · Django · PostgreSQL · Docker · REST API · JWT Authentication
- A full-stack web application designed to enable users to upload monocular video footage of closed spaces and retrieve AI-generated 3D view synthesis through a machine learning pipeline.
- Engineered a React/TypeScript/Tailwind frontend with a Django REST Framework backend, implementing JWT-based user authentication and a media submission system (notes, designed to scale to video uploads)
- Configured a PostgreSQL database with a fully containerised architecture using Docker Compose, enabling one-command local.
- Planned full cloud deployment on Azure/AWS with Nginx as a reverse proxy once the ML model integration is complete
- Designed with scalability in mind: the submission pipeline will feed into a monocular depth estimation and 3D view synthesis ML model.
- Fully testable locally — requires only Docker Desktop; setup and launch instructions are provided in the repository's README.md



06/2025 – In development

## RENT A CAR APP ANDROID

https://github.com/HammadaBE/RentACarAndroidApp

- Kotlin · Android SDK · Gradle: A native Android application allowing users to browse available vehicles and book a rental for a selected date.
- Built entirely in Kotlin following Android development best practices
- Implemented a car selection and date booking flow across multiple screens
- Managed UI state and navigation using Android's activity/fragment lifecycle

Figure 2. Choose A Car

Figure 3.Pick a Date 1.

Figure 5. Calculate Amount

## RESEARCH AND PUBLICATIONS

**11/2025**

- Ebbi, H.B., Vasanwala, M.T.S., Joseph, S. (2025). **An Experimental Comparison of the Effect of Text Preprocessing for Sentiment Analysis Using Ensemble Model.** In: Hewage, C., Kesswani, N., Khan, A., Shekar, B.H. (eds) Responsible Artificial Intelligence. ICRAI 2024. Lecture Notes in Networks and Systems, vol 1504. Springer, Singapore. https://doi.org/10.1007/978-981-96-8441-0_19

## SKILLS

- Google Colab/Jupyter
- Technical documents comprehension
- Customer support needs assessment
- Git/Github
- Salesforce/ Zendesk/Jira
- Python/Keras/TensorFlow/PyTorch
- Power BI/ Tableau/ Excel
- Web Development Django/React
- Databases Windows SQL/Mongo Db
- Could AWS/Azure - Docker/Kubernetes

## LANGUAGES

- Spanish: Native
- Arabic: Native
- English: Advanced C1
- French: Intermediate B1

## CERTIFICATIONS

- AWS Cloud Practitioner
- JPMorgan Software Engineering VEP
